

PANEL DISCUSSION

**IMWS-AMP
2026**

IEEE MTT-S International
Microwave Workshop
Cairns, Australia

IEEE MTT-S/AP-S Young Professionals

Friday, 24 July 2026

11:15 AM – 12:30 PM

Room: Michaelmus A

Mentoring the Future of RF, Antennas and Microwave Technology

Panel Discussion on Supporting Early Career Researchers & Professionals

Join us for an insightful panel discussion on mentoring Young Professionals and Early Career Researchers in RF, Antennas and Microwave Technology. This session will explore the unique challenges and opportunities in guiding the next generation of innovators in this dynamic field. Industry experts and professionals will share their experiences, offering practical advice on career development, research strategies, and navigating the ever-evolving landscape of RF, antennas and microwaves. Whether you're a mentor or a mentee, this discussion will provide valuable insights to help shape the future of innovation in this high-tech industry.

Key Topics Include:

- Building a successful career path in RF, Antennas & Microwaves
- Navigating challenges in early-stage research
- Skills development and professional growth
- Industry insights from mentors

**IEEE MTT-S International Microwave Workshop Series on Advanced Materials and Processes
for RF and THz Applications (IMWS-AMP 2026), Cairns, Australia, July 22- 24, 2026**
